EDITOR'S NOTE

*D'Arcy Little, MD, CCFP, FRCPC* Medical Director, JCCC and [www.healthplexus.net](http://www.healthplexus.net)

I am pleased to introduce the next edition of the *Journal of Current Clinical Care*. In this edition, we offer some new topics as well as articles expanding on themes from recent issues.

We have a *Clinico-Radiological Quiz* by **Dr. Pradeep Shenoy** from the Cambellton Regional Hospital in New Brunswick. A 7-week-old child presented with left periorbital swelling consistent with periorbital cellulitis. Serious complications can result if this condition is not treated properly. Clinical features, investigations, and treatment are discussed.

**Dr. Francesca Cheung** from the Lynde Centre for Dermatology describes a patient with localized hypermelanosis with erythema in a reticulated pattern in her article *Something is Wrong with Her Back*. Erythema ab igne (EAI), the diagnosis, is a skin condition triggered from repeated exposure to heat and infrared radiation. Elimination of the heat source may lead to complete resolution of the symptoms of EAI.

**Dr. John W. DenBoer, et al.**, from the University of Colorado, examine the *Personality and Neuropsychological Correlates of Male and Female Sexual Offenders*. The investigators measured DSM-IV-TR psychopathology and neuropsychological dysfunction among rapists and child molesters using the Coolidge Axis II Inventory, a valid and reliable assessment instrument. The implications of these findings are discussed.

In his article *The Cost of Dementia in the United States: Commentary on the April 2013 New England Journal of Medicine Report*, **Dr. Michael Gordon**, from the Baycrest Centre of Geriatric Care in Toronto, offers our details and a discussion of the staggering and shocking cost of dementia.

I hope you enjoy this issue of JCCC. We look forward to receiving your comments and your article submissions.
